

MOHAMMED GAMAL FATHY AL-JAZZAR

FRONT-END WEB DEVELOPER (Freelance)

Sheikh Zayed City, Egypt | +20 112 227 4748 | g3my@outlook.sa

LinkedIn: [linkedin.com/in/jemmyaljazzar](https://www.linkedin.com/in/jemmyaljazzar) | GitHub: github.com/g3m7

PROFESSIONAL SUMMARY

Front-End Web Developer specializing in HTML5, CSS3, and JavaScript (ES6), trained through the Web Development Challenger Track (ITIDA & Udacity) and the UI/UX & Front-End Development program (ITI). Builds responsive, accessible interfaces using modern layout techniques (Flexbox, CSS Grid, Bootstrap) and version-controlled workflows (Git/GitHub). Eight-plus years in structured, deadline-driven roles have built strong self-management, client communication, and reliability — qualities well suited to independent freelance work. Available for freelance front-end builds, landing pages, and responsive website projects.

TECHNICAL SKILLS

Front-End Development: HTML5, CSS3, JavaScript (ES6)

Responsive Design: Flexbox, CSS Grid, Bootstrap

Other: UI/UX Fundamentals & Wireframing, Git & GitHub, Web Accessibility & SEO Basics, Cross-Browser & Cross-Device Testing

General Computer Skills: Adobe Photoshop (Basic), MS Office Suite, Windows OS Installation & Troubleshooting

PROJECTS

Hands-on training projects completed during front-end development coursework, each built around a practice brief simulating a real business need.

E-Commerce Product Page — HTML · CSS · Bootstrap · JavaScript

Project Brief: Build a responsive product showcase with filters and categories.

- Designed a dynamic front-end layout with interactive product cards and hover effects
- Implemented a fully responsive grid system using HTML, CSS, and Bootstrap
- Built dynamic product filtering functionality with JavaScript
- Tested across multiple devices to ensure consistent responsiveness

Real Estate Listing Page — HTML · CSS · Flexbox/Grid · JavaScript

Project Brief: Create a property showcase with a gallery and detailed listings.

- Developed a clean interface with property cards, image sliders, and adaptive layouts
- Built a fully responsive layout using Flexbox and CSS Grid
- Integrated a dynamic image gallery for property browsing
- Optimized layout and performance for both mobile and desktop

Landscaping & Gardening Services Website — HTML · CSS · JavaScript

Project Brief: Build a modern, green-themed website for a landscaping and gardening business.

- Designed a responsive front-end layout with a nature-inspired visual theme
- Built a hero banner with strong headline, imagery, and clear call-to-action buttons
- Added a statistics section highlighting experience, clients, and team credibility
- Ensured smooth, consistent performance across mobile, tablet, and desktop
